Alden Gillespy — Website Theme Style Guide

This document summarizes the full color system, typography, and theme variables for Alden Gillespy's cinematic + engineering website. Designed for use in Next.js projects.

Color Name	Hex / RGBA	Preview
Background (Light)	#f9fafb	
Background (Dark)	#0b0d11	
Card BG (Light)	#ffffff	
Card BG (Dark)	#111418	
Accent Blue	#2563eb	
Accent Amber	#f59e0b	
Accent Cyan	#06b6d4	
Accent Orange	#fb923c	

Typography

Primary Font (Engineering): Inter — Used for all system, code, and structural text.
Secondary Font (Cinematic): Space Grotesk — Used for headings and creative elements.

Key Theme Variables

• --color-bg / --color-card-bg
• --color-text / --color-subtext
• --color-accent-blue / amber / cyan / orange
• --color-gradient-left / right
• --color-shadow

These variables govern the site's dark/light modes and cinematic color transitions.

Use Notes

– The palette pairs cool engineering tones (blues, cyans) with warm cinematic hues (ambers, oranges).
– Typography hierarchy ensures Inter dominates body and system text, while Space Grotesk anchors titles.
– All gradients use linear transitions from accent-blue to accent-amber.
– Box shadows and vignettes are designed to remain subtle in print or display output.
